

Ekaterine Gloveli

University of Szczecin, Poland

As part of the Erasmus+ academic staff mobility program, I was in Poland at the University of Szczecin in June 2023.

Within the framework of the mobility program, I met both local and international students from Spain, Italy, Cambodia, etc. I gave lectures on tourism statistics. I discussed the system of indicators of tourism statistics, I talked about the statistical ways and methods that are necessary during the statistical analysis of events and processes in the field of tourism. Along with theoretical issues, we discussed practical examples. Statistical data on the number of incoming and outgoing tourists were discussed both for Georgia and on the example of the top ten countries of the world according to the number of incoming tourists.

The academic and administrative staff of the University of Szczecin expressed a great desire to cooperate with the Caucasus University not only in terms of academic staff, but also in the direction of student mobility. Once again, I would like to thank the School of Tourism of the Caucasus University for this opportunity!
