## ABOUT ME

I am passionate about numerous different fields including - music, art, psychology, philosophy, geometry and etc.

There were several things that would arouse my interest and this is why I have finally chosen architecture as my future career.

To be an architect means to be a philosopher, psychologist, musician, poet, painter, engineer and so on. Architecture contains various different disciplines. From my point of view, architecture should always serve society's requirements- it should always be functional and it should always satisfy our needs for comfortable living.

I am joyful that Caucasus University gave me an exceptional opportunity to get such knowledge in my field of architecture.

I have always been thrilled over challenges - getting out of my comfort zone, working hard and being happy with the results is my lifestyle.

Now, as an Ambassador of Caucasus University, I am honored and excited to contribute my skills and knowledge to Caucasus University and its students. I will put an immense effort to create inclusive, interesting, comfortable and friendly environment at CU.
