## ABOUT ME

I am Mariam - a 4th year student of the School of Media. Choosing between the faculty of Fine Arts (Acting) and Healthcare Management, I ended up studying towards bachelor's degree in PR and Communication. However, based on my qualities and lifestyle, I consider that the chosen profession suits me the best.

For a certain period of high school, I lived abroad and constantly communicated with international children. The knowledge and experience acquired there, play a significant role in my educational and career development.

Despite the pandemic and closed borders, I was actively involved in various activities since the beginning of my studies. One of these is the international program "Media Dialogue", where we hosted the delegates from different countries. After that, I had an opportunity to represent Georgia in Ukraine and finish my research there. In addition, in the intramural school science conferences of both the second and third year, by conducting two innovative studies, my partner and I took first place.

I constantly try to diversify my life and career. I believe that taking on challenges is something that makes life thrilling and enjoyable. I always embrace new ideas, travel to different places, try new food and experience the diversity of cultures.
