

DIANA SEROPIAN

04/08/2003

School: Caucasus school of architecture and design

Program: Graphic Design

Course: 3

CU E-mail: d_seropiani@cu.edu.ge

ABOUT ME:

In addition to attending a standard school, I began studying at Komarov School to deepen my understanding of science, especially physics and mathematics. Later, I continued my path at BECAS School, where I gained professional fluency in English through lessons with native American tutors.

I had the opportunity to work as a technical mentor at Majorel, on one of the company's largest and most well-known projects – Apple. Following that, I became actively involved in the events industry, both on a national level in Georgia and internationally.

Outside of my academic and professional journey, sports play a major role in my life – I play volleyball and tennis professionally. Coming from a mixed family, I developed an early passion for languages and now speak mine at a high level.

I love traveling – both with friends and solo – as it gives me a sense of freedom and helps me connect more deeply with the world. I genuinely enjoy meeting new people, especially from different cultures.

I've been passionate about psychology for many years, and design thinking became one of the key reasons I decided to explore this field further. That's why I started studying design – I want to make people's everyday lives more beautiful and harmonious, because I truly believe that our environment has a profound impact on us.
