09/03/2005

School: Caucasus school of architecture and design

Program: graphic design

Course: 3

CU E-mail: K_kiknadze4@cu.edu.ge

ABOUT ME:

I graduated from Public School No. 151, and I am currently a third-year undergraduate student at Caucasus University. Since I started studying at the university, I have been trying to work on myself and establish myself as a professional graphic designer. Nevertheless, after completing this program, I would like to thoroughly study interior design and give this field a career priority, while leaving graphic design as a secondary profession. In addition, I have many hobbies: I am a member of the Caucasus University Folklore Ensemble, I have also completed eleven years of Revaz Lagidze Public School of Arts in the piano department, and during the quarantine period I learned to play the guitar myself. I have been passionate about drawing from a very early age and I perceive this interest as one of the ways to express myself uniquely. Recently, I have become very interested and fascinated by yoga, which has become an active activity in my life. At the same time, I love to skate both rollerblading and ice skating. I am a collector - I collect various types of things, although for the last few years I have been fond of collecting miniature items. In addition to the above-mentioned interests, I really love communicating with people. Meeting new people, interacting with them, or helping them is an important life experience for me.
