Aim of the PhD Program at Caucasus School of Business is to provide students with necessary theoretical knowledge base and skills required for academic learning and research.

As the part of the program, students will not only gain theoretical knowledge, but also skills for successful continuation of their career in scientific research and academic fields. Graduates will be able to apply contemporary research methods to generate new knowledge and use the best available teaching methods to educate others, in line with the contemporary standards in academia to improve control over current challenges. Education received as a part of the program, will be a sound foundation for a success in future professional development for students and will enable them to synthesize theoretical and practical knowledge.
