Mikheil Berishvili

Caucasus School of Technology

The University of Castelo Branco

"When I found out I got into the exchange program, before I knew it, I was already in Portugal, a country steeped in history and beautiful architecture. At first it was really difficult, full of emotions, a new environment, a new society, however, learning started as soon as I arrived and I got used to it.

I am studying electronic and computer engineering. Among the subjects, I chose mobile programming because it is close to my field of interest and allows me to get practical experience and learn new programming languages, which is very important for my progress and development as a software developer. The university campus is located in one of the most beautiful and peaceful cities in Portugal. Student life includes both sports activities and educational conferences. Due to the fact that I work remotely along with my studies, I have little free time, however, as soon as I get a chance to relax, I spend my free time with newly acquired friends, visiting the most beautiful cities and sights of Portugal, which makes my trip even more interesting. The exchange program gives us a unique opportunity, along with education and development, to travel, face new challenges independently, make many friends and make our student period very interesting and memorable."
