

Nikoloz Katsadze

Kaunas University of Technology, Lithuania

Caucasus School of Business

„The best period of my life after my admission at Caucasus University was the fact that I became Erasmus+ exchange program student. I have studied at the Kaunas University of Technology, Lithuania, for one semester. University has made a big impression on me. All of these was a new challenge for me- environment, people and their attitude towards us, European learning method and interrelation with students from different countries.

We have studied together, traveled and shared the traditions and culture of our own countries, learning methods etc. Kaunas University of Technology has become a new rhythm of my life, start of the challenges. The learning process at KTU has been more interesting then I have imagined. Erasmus+ program has given me the opportunity to develop personally as well as professionally and I hope that more students will have the chance to participate into this program.”
