

Sandro Skhirtladze

Caucasus School of Technology

FH JOANNEUM University of Applied Sciences, Austria

„From the very first day since I have applied at the Caucasus University, my goal was to participate into the exchange program. After years of working on my confidence and hard work, I have managed to study in Austria for 2020 spring semester. It was not quite easy to arrive and live alone in the foreign country, but despite all hardships, I have gained new friendships from different countries, I have received the experience of communicating with foreign students, I have become independent and most importantly I have received European education.

Participating into the exchange program is unforgettable experience, which changes a person and its ideology. I wish many students had the opportunity to leave and study in a foreign country.”
