**FH JOANNEUM University of Applied Sciences, Graz, Austria**

**ERNST MACH grant holder - Austrian government grant**

Going to study in Austria turned out to be one of the best decisions of my life. The application process wasn't easy, but not as complicated as I initially imagined. The main thing is to give it your best at all times. The questions in the application must be answered wholeheartedly and thoroughly. The sincerer you are the higher your chances of success.

The learning environment here is amazingly healthy, competitive and at the same time quiet. We have highly qualified lecturers and the entire process feels more like a sharing of experience rather than just a lecture process. Finally, I would like to point out that Austria is the best place for student life and travel. From Vienna for only 10 euros you can get to European cities such as Venice, Florence, Amsterdam, Paris and many more.
