

Prof. Dara Ahmed,

FH JOANNEUM University of Applied Sciences, Austria

„In May 2024, I had the pleasure of attending an outstanding event "International Staff Week" in the Framework of EU4DUAL under Erasmus project in FH JOANNEUM University of Applied Sciences in Graz, Austria. The topic of the event was "Future of Work". 21 participants from 11 countries participated the event. This event enhanced knowledge on the trending issues and also strengthened the exchange of ideas and experiences. Interaction with colleagues from different cultures is incredibly enriching. Important workshops were organized on 'Digital Transformation', 'Entrepreneurship', 'Shaping the Future of Work', and 'Digitalization along the Value'.

We also had a keynote speech on AI (Artificial Intelligence). In addition to the above, three amazing visits to three excellent factories (Gosser Brewery, Andritz Group, and Zotter Chocolate Factory) were organized in three different days. These useful visits enhanced the knowledge about the trending system being used on the manufacturing process and the relevant operational system. At the end, the event was successful, effective, and interesting. The presence of colleagues from different countries in this event added substantial value to the development of new networking opportunities. Sharing of experiences, possibilities of further collaboration, getting familiar with diversified cultures are also the major achievements of this event.”
