

Andro Babuadze

Caucasus School of Business

Inholland University of Applied Sciences, The Netherlands

„The Erasmus+ exchange program in the Netherlands was one of the most interesting experiences of my life. It was not only a discovery of a new environment, but also an opportunity for in-depth knowledge and intellectual growth. I made many friends of different nationalities, which in itself taught me a lot not only about them but also about their homelands and cultures. I would like to say a big thank you to Caucasus University for giving me this opportunity.

One of the main places that remains a part of this experience for me is Inholland University. The teachers and staff were very professional, they were always ready to help and support. The environment at Inholland was ideal for studying, as great conditions were created for everyone here, both academically and socially.

The Netherlands is a special country, with beautiful cities and friendly people. I enjoyed the country's environment, visited famous places and most importantly, felt independence and responsibility. I recommend everyone who has the opportunity to participate in such programs.”
