

Tamar Tsertsvadze

Kaunas University of Technology

"Within the framework of the Erasmus+ academic mobility program, I had the opportunity to visit Kaunas University of Technology.

I conducted lectures on the basics of management and human resources management for local and international students. During the lectures, we talked about the importance of communication and carried out practical activities such as analyzing problem situations. As part of practical activities, students had the opportunity to make presentations in groups.

Within the framework of the working visit, I met the academic staff of the university and representatives of the administration. Also, I had the chance to share my experience with them and present the Caucasus University.

I am very glad that I had the opportunity to introduce the Caucasus Business School to my Lithuanian colleagues."
